

A First Look at PDPM Claims: Lessons Learned

November 21, 2019 | Hilton Richmond Hotel and Spa/Short Pump

Judy Wilhide Brandt and Mark McDavid are analyzing actual Virginia claims data under the new Medicare Patient Driven Payment Model (PDPM). With input from their analysis, you can learn how to maximize your reimbursement under the new system.

This program is for clinicians actively managing a Part A census under PDPM. Judy Wilhide Brandt will take a deep dive into areas of clinical assessment, data collection and MDS coding where you may be prone to missing reimbursement opportunities. She will also share Assessment Reference Date (ARD) management strategies for the PPS 5-Day and the Interim Payment Assessment (IPA). Mark McDavid will discuss and explain group/concurrent documentation requirements and therapy practice changes occurring in therapy departments. Both will discuss issues concerning GG data collection.

Agenda

8:30-9:00 am	Registration and Continental Breakfast
9:00-10:00 am	Review of Therapy Practice Changes and Group/Concurrent Documentation Requirements
10:00-10:15 am	Break
10:15-11:15 am	Review of Commonly Missed Non-Therapy Ancillary (NTA) and Nursing Components
11:15-12:15 pm	How Small Changes in Process Can Result in CMI Jumps for the Speech-Language Pathology (SLP) Component
12:15-1:00 pm	Lunch
1:00-2:00 pm	How to Code Surgery and Its Impact on Payment
2:00- 2:15 pm	Break
2:15-3:30 pm	Discussion of Section GG Documentation Requirements
3:30-4:00 pm	Review of the Importance of Accurate ICD-10 Coding
