

Life Safety Compliance Boot Camp

Hilton Richmond Hotel & Spa/Short Pump

August 16-17, 2022

Sign up for the Life Safety Compliance Boot Camp and bring your maintenance director to ensure your center is compliant with the federal, state, and local life safety and building codes. Led by nationally recognized life safety expert **Roy LeNeave**, this 1.5 day training will provide you with practical advice and strategies to keep your residents and staff safe.

This training will help you be survey and inspection ready by learning what the Office of Licensure and Certification and local fire authorities are looking for. Remember, OLC is conducting life safety/CMS inspections within 14 days of clinical surveys to assess NFPA code compliance and CMS regulations. Local fire authorities or the State Fire Marshal conduct inspections focused on the 2015 State Fire Prevention Code. The training also applies to assisted living facilities as many of the code standards are the same.

The training will cover critical areas for life safety compliance including: oxygen and oxygen safety; recordkeeping; special locking devices; fire drills; generators; patient care-related electrical equipment (PCREE); and inspections for exit signs, emergency lights, pull stations, rated doors, corridors, fire extinguishers, electrical receptacles, and eyewash stations. This training is geared for administrators, regionals, and maintenance directors. Attendees will be given a full-color study binder to use as a reference tool to prepare for surveys/inspections.

Agenda

August 16, 2022	
12:30 – 12:45 pm	Welcome & Introductions
12:45 – 2:30 pm	Life Safety Compliance - Focus Items
2:30 – 2:45 pm	Break
